## CAREER OBJECTIVE

Experienced hospitality professional with 9 years in the industry, seeking to transition to a front-end web development role. Proven track record in staff management, communication with upper management, and collaboration with international colleagues. Demonstrated ability to provide exceptional service to VIP guests. Eager to apply strong problem-solving skills, attention to detail, and a commitment to excellence in a front-end web development position. Passionate about building responsive, user-friendly web applications and excited to contribute and collaborate with a team on innovative tech solutions while continuing to grow in the fast-paced web development industry.

## SKILLS

- Programming Languages:** HTML, CSS, JavaScript, TypeScript
- Web Development:** Responsive designs, Front-End Frameworks (React: useState, useEffect, and useReducer | Tailwind)
- Tools and Technologies:** GitBash, GitHub, Visual Studio Code

## RELEVANT EXPERIENCE

### Chungdahm Philippines Mar 2024 - Present

#### English Tutor

- Remote Collaboration:** Worked effectively with a team of tutors to deliver synchronized lesson materials, demonstrating strong communication skills and the ability to coordinate with others in a remote environment.
- Data Management:** Contributed to a shared file system to track and update students' progress, showcasing attention to detail and organizational skills.
- Teamwork:** Regularly collaborated with colleagues to ensure the consistency and quality of lesson materials, highlighting the ability to work within a team and manage shared responsibilities.

### Wynn Resorts Macau Jul 2018 - Sep 2022

#### Restaurant Team Member

- Cross-Cultural Collaboration:** Worked closely with international colleagues to deliver high-standard service, showcasing my ability to collaborated with diverse team and adapt to various work style.
- Problem-Solving Under Pressure:** Successfully handled and resolved customer complaints in a fast-paced environment, demonstrating strong problem-solving skills and the ability to maintain composure under pressure.

## PROJECTS

### Recipe Web App

- App built using React (JSX, React Hooks, React Router, and useReducer)
- A web application that fetches and displays recipes. Key functionalities include searching for specific recipes, displaying recipes by categories, and toggling the visibility of ingredients and instructions.

### E-Commerce Web App

- App built using React (JSX, React Hooks, and React Router)
- A web application that displays sneaker products. Key functionalities include adding products to the cart and viewing detailed product information.

### Swift

- Website built using React (TSX and React Router) and TypeScript
- A digital bank website combining a youthful, modern design with the reliability of traditional banking—featuring sleek UI, easy onboarding, and user-friendly financial services.

### News Web App

- App built using HTML, CSS, and JavaScript (Async/Await)
- A web application that fetches and displays the latest news articles from various sources.

### The Vape Lab

- Website built using React and Bootstrap
- A vape marketing website showcasing the brand's identity, affiliate partnerships, e-commerce collaborations, success stories, unique process, and a helpful FAQ section for a user-friendly experience.
